## PROJECTS

---

- **All in one Text Editor**- The “All In One Text Editor” is a text editor developed with a purpose of providing special features like auto-alignment, auto-correct, auto-complete, Greek letter insertion, and provision for conversion of the prepared document to PDF and converting and editing a PDF as a document file. It is compatible with both Windows and Linux. It was developed using Java, Swings, and AWT in Net Beans.
- **Online Canteen Management System**- “clickformmeal” has been developed to provide an online platform for selecting and ordering one’s meal in colleges and schools for the students. It provides an agile facility of online payment thus saving the time of the students to stand in long queues waiting for their order. It also provides provision to sellers to have a separate administrator account to manage their menu items, monitor sales and analyze current ongoing business. It was developed in Adobe Dreamweaver with the use of HTML, CSS, JavaScript, Bootstrap, PHP, MySQL and Apache web server.
- **Training Management System**- OTMS (Online Training Management System) is a web based management system built using PHP, HTML, CSS that enables you to drive effective employee training tracking and completion, empowering you to schedule training and employees can register for it with a single click. OTMS has been developed with a purpose to revolutionaries the traditional method of receiving training requests by upgrading it to online platform and digitalizing it.
